German Democratic Republic [redacted] 25X1A

REICHSBAHN ROLLING STOCK REPAIR PROGRAM FOR THE FIRST QUARTER OF 1951
(7 pp; German; Feb 1951)

25X1X [redacted]

25X1C [redacted]

Page 1 informs the repair yards that the enclosures constitute the repair plans for January through March 1951 and that the plans for April 1951 will be established during the month of March on the basis of previous performance of the repair yards.

Pages 2 - 4 are the freight car repair plans for January through March 1951, [redacted] up by repair yards and subdivided by types of freight cars. The special column shows the number of axles of cars. Two-axle cars by far outnumber 4-axle cars (5,595 : 331 for January and similar ratios for February and March).

Pages 5-7 constitute the passenger car repair plans. They to be set up in the manner indicated above. Only a limited number of repair yards are engaged in passenger car repair. The ratio of 2-axle to 4-axle cars is less conspicuous (4:1 for January and 2:1 for February and March).
